AI Search Readiness

97 AI readiness
97/100

How easily AI answer engines such as ChatGPT, Gemini and Perplexity can crawl, understand and cite this page. Every item below is measured on your site.

Quick wins 1

llms.txt file: No /llms.txt found. Adding one helps AI engines pick the right pages to cite.

How this score works

We measure what AI answer engines can actually see on your site: whether your robots.txt allows GPTBot, OAI-SearchBot, ClaudeBot, PerplexityBot, Google-Extended and CCBot, whether an llms.txt exists, plus JSON-LD schema, a single H1, meta description, canonical URL, indexability, content depth, Open Graph tags and a declared language. Each item is weighted, and a warning counts as half credit.

What we do not claim: we do not estimate how often ChatGPT, Gemini or Perplexity mention your brand. That cannot be measured without querying those models, so we do not publish a number for it.

AI crawler access

Congratulations! Your robots.txt does not block any major AI crawler.

Most Common Keywords

It is unlikely that there is a specific keyword density that is optimal for search engines (as their algorithms have evolved beyond using keyword density as a ranking factor). However, it can be helpful to see which keywords are most commonly used on your page and whether they accurately reflect the intended topic. More importantly, the keywords on your page should be used naturally and in grammatically correct copy.

Custom 404 Error Pages

This website **does not have a custom 404 error page!** Default 404 error pages result in a poor user experience - they can mislead users into thinking the entire site is down or broken, increase the likelihood that they will leave the website, and appear unprofessional. It is recommended to have a custom 404 error page to improve the user experience for your website by letting users know that only a specific page is missing or broken (not the entire site). You can also provide helpful links, the opportunity to report bugs, and potentially track the source of broken links.
