AI Search Readiness

AI readiness

91

91/100

How easily AI answer engines such as ChatGPT, Gemini and Perplexity can crawl, understand and cite this page. Every item below is measured on your site.

Quick wins 2

Content depth: The page has about 554 words of visible text. AI engines prefer substantive pages they can quote.

llms.txt file: No /llms.txt found. The file is optional: Google says AI text files are not needed to appear in its AI features.

How this score works

We measure what AI answer engines can actually see on your site: whether your robots.txt allows GPTBot, OAI-SearchBot, ClaudeBot, PerplexityBot, Google-Extended and CCBot, whether an llms.txt exists, plus JSON-LD schema, a single H1, meta description, canonical URL, indexability, content depth, Open Graph tags and a declared language. Each item is weighted, and a warning counts as half credit.

What we do not claim: we do not estimate how often ChatGPT, Gemini or Perplexity mention your brand. That cannot be measured without querying those models, so we do not publish a number for it.

AI crawler access	**Congratulations!** Your robots.txt does not block any major AI crawler.
llms.txt file	No /llms.txt found. The file is optional: Google says AI text files are not needed to appear in its AI features.
Structured data (JSON-LD)	**Congratulations!** Found 2 JSON-LD block(s). AI engines use this to identify your entity.
Single descriptive H1	**Congratulations!** Exactly one H1, which clearly states the page topic.
Meta description	**Congratulations!** A meta description is present for AI engines to summarise.
Canonical URL	**Congratulations!** A canonical URL is declared, so citations point at one address.
Indexable (no noindex)	**Congratulations!** The page is indexable.
Content depth	The page has about 554 words of visible text. AI engines prefer substantive pages they can quote.
Open Graph tags	**Congratulations!** Open Graph title and description are present.
Declared language	**Congratulations!** The page declares its language.

Most Common Keywords

It is unlikely that there is a specific keyword density that is optimal for search engines (as their algorithms have evolved beyond using keyword density as a ranking factor). However, it can be helpful to see which keywords are most commonly used on your page and whether they accurately reflect the intended topic. More importantly, the keywords on your page should be used naturally and in grammatically correct copy.

Custom 404 Error Pages

This website **does not have a custom 404 error page**! Default 404 error pages result in a poor user experience - they can mislead users into thinking the entire site is down or broken, increase the likelihood that they will leave the website, and appear unprofessional. It is recommended to have a custom 404 error page to improve the user experience for your website by letting users know that only a specific page is missing or broken (not the entire site). You can also provide helpful links, the opportunity to report bugs, and potentially track the source of broken links.
