# AI Search Readiness

**91** **AI readiness**
91/100

How easily AI answer engines such as ChatGPT, Gemini and Perplexity can crawl, understand and cite this page. Every item below is measured on your site.

**Quick wins** 2

**llms.txt file:** No /llms.txt found. Adding one helps AI engines pick the right pages to cite.

**Meta description:** No usable meta description, so engines will invent their own summary.

**How this score works**

We measure what AI answer engines can actually see on your site: whether your robots.txt allows GPTBot, OAI-SearchBot, ClaudeBot, PerplexityBot, Google-Extended and CCBot, whether an llms.txt exists, plus JSON-LD schema, a single H1, meta description, canonical URL, indexability, content depth, Open Graph tags and a declared language. Each item is weighted, and a warning counts as half credit.

**What we do not claim:** we do not estimate how often ChatGPT, Gemini or Perplexity mention your brand. That cannot be measured without querying those models, so we do not publish a number for it.

**AI crawler access**

**Congratulations!** Your robots.txt does not block any major AI crawler.

| | |
|---|---|
| **llms.txt file** | No /llms.txt found. Adding one helps AI engines pick the right pages to cite. |
| **Structured data (JSON-LD)** | **Congratulations!** Found 1 JSON-LD block(s). AI engines use this to identify your entity. |
| **Single descriptive H1** | **Congratulations!** Exactly one H1, which clearly states the page topic. |
| **Meta description** | No usable meta description, so engines will invent their own summary. |
| **Canonical URL** | **Congratulations!** A canonical URL is declared, so citations point at one address. |
| **Indexable (no noindex)** | **Congratulations!** The page is indexable. |
| **Content depth** | **Congratulations!** The page has about 1946 words. AI engines prefer substantive pages they can quote. |
| **Open Graph tags** | **Congratulations!** Open Graph title and description are present. |
| **Declared language** | **Congratulations!** The page declares its language. |

## Most Common Keywords

It is unlikely that there is a specific keyword density that is optimal for search engines (as their algorithms have evolved beyond using keyword density as a ranking factor). However, it can be helpful to see which keywords are most commonly used on your page and whether they accurately reflect the intended topic. More importantly, the keywords on your page should be used naturally and in grammatically correct copy.
